

## Exercises for 02-Types

### Types

1. If you want to count the number of goals in a game of handball, what would be a good type for a variable?
2. If you want to store the name of a person in a variable, what would be a good type for that name?
3. You want to store the mean value of the results on an exam. Can you recommend any type?
4. Add an integer variable with the value 1 with another integer variable with the value 1.
