

02-Function invocation

Introduction

Before writing your own functions or methods we believe it is good to get familiar with how to use functions or methods written by someone else - a bit like reading first and then learning to write.

Purpose

It would be useless to have functions and methods and not being able to use them. This lecture introduces how to invoke a function/method.

Requirements

variable type block

Videos

- [Programming/function-invocation/function-invocation-small.webm](#)

Reading instructions

No reading instructions

Goal

The student shall:

- be able to invoke a simple function/method

Exam instructions

All exercises are examples of questions that may end up on an exam.
