

## **First meeting of course representatives for EDA093 / DIT401 - Operating systems**

**Date:** 2020-09-10

### **Participants:**

#### **Course responsible:**

Vincenzo Gulisano

#### **Student representatives:**

Johannes Binde

Stig Arne Knoph

Elias Persson

Jacob Thorselius Pedersen

### **Minutes of the meeting:**

List of changes since last year:

- 1) Course moved online because of COVID-19, which of course required changes in the organization of lectures.
  - a. Video recordings

People seem to like it overall. Naming lecture videos based on their content has been appreciated.

- 2) Major update of labs, restructured this year
- 3) New lecture on virtualization
- 4) Invited lecture from Yiannis Nikolakopoulos
- 5) Exam organization via Canvas

How to get more live discussion during lectures? Maybe use breakout room, 3-4 people in each? And maybe Google Forms could be used for general questions? Vincenzo will ask how people feel next lecture.

Exam will be on Canvas, will not use Zoom. Order of questions will be randomized, and students will not be able to go back to a previous question once it has been answered. Vincenzo will compile some information surrounding the exam and put it on Canvas.
